

Township Resident,

June 20th 2019

As you are aware Lake St. Clair is currently at a historically high level. The level of Anchor Bay on June 20, 2019 is at approximately 577.60 (highest level recorded). The Army Corps of Engineers is estimating that Lake St. Clair *could* continue to rise throughout the next several months. We expect additional Anchor Bay flooding throughout Chesterfield Township. The amount of water related damage is also directly related to rain events and wind direction, both of which are unpredictable.

Sand Bags / Sand Bagging Operation: As of June 20, 2019 Chesterfield Township DPW has coordinated with residents on approximately 1.3 Million Pounds (450 Tons) of sand in approximately **37,000** sand bags. Our team will continue this effort for as long as it is necessary, while continuing to explore ways of easy deployment and filling efforts. Please visit www.chesterfieldtwp.org for updates.

Coordination of Efforts: Chesterfield Township is coordinating preparation with our partners at Macomb County as well as State and Federal official's and departments. It is highly recommended that you pay attention to all National Weather Service watches and warnings regarding information in our area. Also attached is a link to FEMA flood plain maps that may assist you in determining potential effected areas. The potential parcels impacted are based on elevation above sea level, and may not be obvious.

The water level is currently impacting some roadways, and we expect additional roadways to be impacted as the water rises an additional couple of inches. Please prepare; protect your homes, property, and exercise caution when or if you encounter water over our roadways, filled drains, downed electrical lines, or any other hazard that you may encounter. We are hoping and praying for the best, while preparing for the worst. I urge you all to do the same. Please feel free to contact me at (586) 549-3766 if I can be of any assistance.
